

Unlimited Network Web Services

Website Design Advanced Package

Advanced website components.

After you have your basic website that inspires visitors to investigate what you have to offer and you are set up to capture visitors email addresses, listen to audio, watch video and can take orders (If you don't have this go back and start your Basic Package.) you may want to communicate more with your visitors, set up other features that inspire them and set up advanced services where you can charge for different levels of services that you provide.

Here are some of the most common features:

- Emails.
- Additional web pages.
- Autoresponders (We need to plan these and then estimate the time involved.)
- Audio and video streaming.
- A Newsletter template.
- A Blog.
- Social Networking.
- A quiz.
- Flash programs.
- A Forum.
- A Membership site.
- Online Seminars.

When you realize how Internet helps your business you may want to upgrade your website by adding these services. Call me and I can assist you with programming this. (Cost is calculated per project.)

I'm looking forward to hearing back from you and starting our project. Reply to this email Arne@UnlimitedNetwork.com or call me at: (443) 223-0877.
