## Your Website Maintenance Package

### Components usually involved in maintaining a website.

Maintaining your website is an ongoing process of caring for it so it stays alive. When people arrive there they should feel like somebody is home and still standing behind this website. When you update your website you also make people want to come back.

- Changing, updating and/or adding text and pictures on your website. (Estimated time is per item.)
- Monthly Newsletters:  
(Estimated time to write the newsletter: You do.)  
(Estimated time to create each individual monthly newsletter: 4 hours.)  
(Estimated time to upload the newsletter: 1 hour.)
- Adding or updating your Autoresponders. (Estimated time is per item.)
- Adding a product or service. (Estimated time is per item.)
- Updating your schedule. (Estimated time is per item.)
- Website Search Engine Optimization: Search engines change their rules and people's interest change so every 6 months or so it is good idea to take a look at your Search Engine status. (Estimated time to analyze this: 4 hours.) (Estimated to time to update depends on how extensive the search engines have changed.)

You may get new ideas for your website or want to change something on your website. Just email or call me and we'll make it happen. (Estimated time depends on the project.)

**Cost Calculation** for maintenance is based on a \$35/hour.
